

New Sample Preparation Facility in Hulunber, Inner Mongolia, China

Recently, significant portions of ground in Hulunber, northeast part of Inner Mongolia and China, have been converted into exploration licences. In response to the increased activity in this area, ALS Minerals has established a new sample preparation facility in Hulunber.

Exploration companies operating in this area can now submit samples directly into the Hulunber facility which is located immediately behind the Mengxi Logistics Park, Hailar District. Samples will be prepared under the same stringent controls and quality procedures employed at any of the ALS Minerals locations worldwide.

Prepared samples are then shipped directly to the ALS Minerals Guangzhou analytical laboratory. This analytical laboratory serves as the major analytical hub laboratory for China and holds MOLAR, CMA, CNAS, as well as ISO9001-2008 accreditation.

在中国内蒙古新设立的呼伦贝尔制样室

近来，在中国东北地区、暨内蒙古东北部的呼伦贝尔地区，矿业勘探比较活跃，为此，澳实矿物实验室在海拉尔建立了一个新的制样室。

在本地区有勘探项目的公司，可以直接向该制样室送样，该制样室位于呼伦贝尔市海拉尔区蒙西物流建材城后。该制样室严格按照澳实矿物实验室全球一致的质量要求和流程提供样品制备服务。

制好的样品将运到澳实矿物实验室广州测试中心做分析检测。澳实矿物实验室广州测试中心是一个区域性中心实验室，具备国际、国内资质，即“地质实验测试资质”、“计量资质”、“实验室行业认可”、以及 ISO9001 等。
