

New Laboratory in Solwezi

ALS Minerals operates a Sample Preparation laboratory for Kansanshi Mine in Solwezi, Zambia, which has been operating since May 2006. Recent increased mining and exploration in Zambia prompted the establishment of a local laboratory to analyze samples.

NEW ALS Minerals Analytical Laboratory in Solwezi, Zambia

The Solwezi analytical laboratory started operation with method validations on the 27th of April 2011, and began commercial analysis from May 2011, after satisfactory comparisons with results from other labs.

The laboratory has a fire assay section, a cyanide lab, a weighing room and a geochemistry and spectroscopy sections. The lab offers methods for copper and gold projects.

The establishment of a local analytical laboratory will improve turn-around time to 4 days for both sample preparation and analysis.
